Established in 1998, LEADCOM SEATING (LIJIANG SEATING GROUP) has become the top public seating manufacturer in China with 3 manufacturing facilities and over 850 people employed. We are specialized in auditorium seating, cinema seating, theater seating, home theater seating, waiting area seating, lecture hall seating. 99% of our products are well tooled in our full range workshops and industry-exclusive testing room upon raw materials arrive in our facilities.

We have a seating research and production base located in the Science and Industry Zone in Sanshui City, Center in Foshan, Guangdong Province. The base, which covers a total area of 120,000 square meters, produces more than ONE MILLION chairs per year.

Our products enjoy high reputation among our customers all round the world with their high performance, ergonomic design, exceptional comfort and incredible durability.

Everything we do is driven by our customers: what they need and how we can help them find the best solutions. With Leadcom Seating, you can be assured of getting our best.
Why do we stay at the top?

LEADCOM SEATING has the biggest research and production base in China, with a total acreage of 120,000 square meters and a yearly production of 1,000,000 chairs and a yearly raising speed by 10%-20%.

We have advanced machineries and techniques for every step of production process. Every parts of your chair: seat, back, armrests, leg, beam, writing table, footrest, cover and other components and accessories are well-tooled within our full range workshops upon raw materials arrive in our facilities. Each component is manufactured individually and then assembled in our assembling line under perfect supervision and control.

Our workers are all well-trained and very skilled in operating machineries and production processes. We are proud to provide you the best combination of value and quality seating products.
Before the production process even begins, LEADCOM selects the finest materials for our products. Our skilled staff move those materials through the production process to make sure that each and every stage produces satisfied results.

We have established the system of perfect quality control according to ISO9001 and ISO 14001 quality management system with quality controllers and inspectors during all phases of production. These inspections begin with an evaluation of the incoming raw materials.

Various physical characteristics and performance product samples will be processed through strict testing under specific required conditions in our industry-exclusive testing room. Essential parts will be sent to a certified testing and inspection center such as SGS for further verifications. Additionally, Our quality controllers and inspectors will also examine the appearance, color, and odor of material samples.

We have found that only by strictly controlling the quality at the start of production can they ensure that a consistent finished product will be achieved.

Here in LEADCOM, we do everything in our power to make a perfect chair for you.
The NO. 1 supplier in China market excel at Auditorium and theater seating.

The NO. 1 supplier in China market exported most movie theatre seating to USA (per local customs statistic of 2009).

The NO. 1 supplier in same China sector who exhibited more than 8 shows worldwide.

The OEM supplier for Spain seating company and other top seating companies around the world.

STRATEGIC COOPERATION

LEADCOM realizes earlier than other seating manufacturers in China that globalization of business and markets is more vital than ever, so we not only improve our strength by introducing advanced machines and technologies from France, Korea and Japan, but also by cooperating with our strategic partner: DELAGRAVE S.A from France who has more than 100-year experience in public seating.

After LEADCOM signed a strategic cooperation agreement with DELAGRAVE in 2008, both parties have been working together towards mutual development. According to the agreement DELAGRAVE has sent experienced experts to LEADCOM’s production base for product design development and quality control. Both parties are committed to produce public seating which meets international market demand.
