Guangdong Monalisa Trading Co., Ltd. is a wholly-owned subsidiary of Monalisa Group Co., Ltd., which undertakes the export business of its own products.

Monalisa Group Co., Ltd. (hereinafter referred to as Mona Lisa Group) is located in Xiqiao Town, Nanhai District, Foshan City. It is a high-tech, A-share listed ceramics company integrating scientific research and development, creative design, professional production and marketing. The Monalisa Group was established in 1992, transformed from collective ownership to private enterprise in 1998, and established a joint stock company in 2015. It was listed on the Shenzhen Stock Exchange in 2017 (stock code: 002918). Monalisa Group has ten holding subsidiaries and four modern production facilities for building ceramics. It has 37 production lines in Xiqiao of Foshan, Qingyuan of Guangdong, Tengxian County of Guangxi and Gao'an of Jiangxi, producing such products as ceramic tiles, porcelain slabs and porcelain art.

Monalisa Group has three brands of "Monalisa" ,"QD"and "merqi". It has established more than 4,000 franchised store and marketing showrooms covering all provinces, cities and autonomous regions of China, providing timely and thoughtful services for consumers.

SLAB

1,600x3,200mm 63”X126”
900x2,600mm 35”X102”
900x1,800mm 36”X72”

Big, light, thin are the characteristics of the slab. Compared with the traditional ceramic tiles, they are more resistant to fire, high temperature, pollution, corrosion and zero penetration. Slab is produced at high temperature, the grade of Mohr hardness can reach 6. Excellent scratch and wear resistance, rich and vivid stone texture, makes the sintered stone more and more popular in the application of kitchen cabinets and furnitures. It is more durable with its outstanding advantages. It is widely used in home furnishing such as the kitchen top and splash, vanity top, dining-table top, meeting table top and so on.

ROMAN SUPERSTONE

1,800x3,600mm 72"X144"
1,600x3,200mm 63"X126"
1,200x2,400mm 48"X96"

Super stone series porcelain panel: there are 5.5mm,8.5mm,13.5mm and 20.5mm thickness for choices for different area application. Its 2400X1200mm large size design makes space collocation application more diversified. It adopts the full body fabric technique and use the simulation design to restore the original color and texture of the natural stone. Application in projects: cladding of outside wall of business building,lobby floor of hotel,cladding of indoor wall.

LUXURY STONE
900x1,800mm 36"x72"

Mondalisa brand-new Luxury Stone series, also called the Seven Star. We succeeded to copy the crystal texture of the very rare and precious stones from Africa in colour, pattern, and the sense of depth. By using the transparent glaze and dry-frits from Italy, it provides double protection for the surface of our Luxury Stone. It has excellent stain resistance alongside with prefect flatness. Its large format in 900x1800X10mm and multiple faces, gives different possibilities in applications. Unlike natural marble, our porcelain slabs are radiation-free, non-porous, stain resistant and durable. In addition, with bigger sizes and fewer grout lines, your space is less cluttered and visually expanded. It can be widely used as flooring and wall cladding, particularly in high-end resorts, fashion store, banquet hall, recreation club and even countertops.

THIN TILES
1,200x2,400mm -48"X96"

The thin porcelain tiles, designed with the texture of natural stone, sandstone and wallpaper, recreate the true style and feature of natural stone by using the latest stereo ink printing technology. The thickness is only 5.5mm Lighter in weight, more excellent in performance, it can widely meet the needs of all-space decoration of indoor and outdoor walls and floors, and create a unique style of environmental protection light life.

NEO STONE

1,200x2,400mm 48"X96"
900x1,800mm 36"X72"

With our advanced ink-jet printing technology and special frits from Italy, our dream of replicating marble textures to tiles has come true. The porcelain Slabs are radiation-free, non-porous, stain resistant. The surface is flat and shiny like a mirror. It can be widely used as flooring and wall cladding, particularly in high-end resorts, fashion store, banquet hall, recreation club and even countertops.

INSTALLATION TOOLS

THIN-SET METHOD

1. PREPARE THE SUBSTRATE

The surface of the substrate should be clean and free of any substance that may prevent,reduce or affect adhesion or performance. Before installation,wash the substrate and make sure it is clear of any residue larger than 10 mm in diameter. Wait till there is no water on the substrate to start installation. Divide the substrate according to the design needs and mark standard point of the surface to control the size out of the wall and the vertical flatness. (FIGURE 1&3)

FIGURE 1

FIGURE 3

2. MIX THE ADHESIVE

Pour some water in a bucket and add the powdered adhesive. Mix it with a low-speed electric mixer until it is the same consistency as toothpaste. (Figure 4-5)

FIGURE 4

FIGURE 5

3. APPLY THE ADHESIVE

Use the flat side of the notched trowel to apply a flat layer of adhesive on the substrate,then run the notched side at a 45- to 60- degree angle through the adhesive and comb it into continuous and erect ridges. Apply the adhesive in the same way on the back of each porcelain panel. (Figure 6-7)

FIGURE 6

FIGURE 7

4. PREPARE THE SUBSTRATE

Lay the back-buttered porcelain panel one by one on the combed substrate. For safety and proper installing,use the suction cup handling bars to move the panels. (Figure 8-9)

FIGURE 8

FIGURE 9

5. LEVEL AND BED THE PANELS

Tap in the whole porcelain panel with a rubber mallet to ensure solid bond strength of the adhesive between the panel and the substrate. (Figure 10-11)

FIGURE 10

6. ADJUST THE FLATNESS AND EVENNESS

For perfect level and efficient installation of porcelain panel,levelers should be used. (Figure 12)

FIGURE 12

7.

CLEAN AND GROUT THE PANELS

After lying the panels,insert the clips underneath them and along the 4 sides. Then insert the wedges in the clips slot and adjust them with the special traction-adjustable-pliers to adjust the joints and make ensure the evenness between panels.
(Figure 13-14)

8.

REMOVE THE CLIPS

Once the adhesive is fully set,remove the protruding part of the clips with a rubber mallet.
(Figure 15)

9.

CLEAN AND GROUT THE PANELS

After the porcelain panels are installed,remove excess adhesive on the surface to protect the panels from any stains or marks. Then apply grout,clean up after grouting and maintain as needed.
(Figure 16-17)

CUTTING INSTRUCTION

1.

CUTTING AND DRILLING

You can easily cut a 5.5Mm porcelain panel with a diamond-tipped cutter or glass cutter available in the market.

1. Score the surface from one edge to another, with the cutting point always touching and moving along the cutting line at a vertical angle. Run the cutting point through the whole line once with continuous and even pressure.
(Figure 1)

2. After completing the score line, apply firm and even pressure to snap the panel cleanly along the score with one hand on the center of each side of the score or with both hands on the center of one side of the score.
(Figure 2)

FIGURE 13

FIGURE 14

FIGURE 15

FIGURE 16

FIGURE 17

FIGURE 1

FIGURE 2

FIGURE 3

FIGURE 4

3. A slightly curved cut can be made using a manual glass cutter and is ideal for fitting in borders.
(Figure 3&4)

4. Manually or electrically smooth the cut edge with a diamond pad for best edge treatment and to avoid a sharp edge.
(Figure 5.1&5.2)

Note: 8.5-20.5Mm porcelain panels should be cut with a cutting workbench and tools specialized for stone or traditional ceramic tiles. Alternatively a hand-held marble cutter may be used for small projects.

2.

SHAPED CUTTING

2-1. Arc line cutting: make a mould of the intended shape, and draw out cutting lines on the panel along the mould. Use a high-speed hand-held wheel cutter to slowly press across the lines.
(Figure 7&8)

2-2. Square cutting: plan the square by marking and linking 4 relief holes, drill the holes to an appropriate size and cut along the lines with a hand-held cutter.
(Figure 9&10)

3.

DRILLING

3-1. Mark where the hole will be drilled, and drill it with an electric drill fitted with round/cup diamond core drilling bits with continuous teeth and in good condition. Different cutters are selected according to the sizes of the holes. Drilled or cut porcelain panels should be handled and stored with care. (Figure 11)
